Introduction

The roles define what can be done whilst logged into the back end.

The Chairman role and Clerk role are very similar except when it comes to meeting minutes.

The clerk can upload the file and create the meeting minutes item but can't publish it, once published it is available in the dropdown list within the meeting content item

The 3rd role is "Page Manager" this is much more restrictive and should not allow a user with this to access the more sensitive functions & areas of the site.

The Idea is to allow enough control to get the work done but not so much that a less experienced user could break things

Each user must have a role selected. There is no limit to the number of people that can have the same role.

Each block below shows all that could be allowed and if the box is checked what is allowed for that role

Roles

The Clerk Role

Core Content Features

OrchardCore.Contents Feature

Permission	Allow
Edit own content	<input checked="" type="checkbox"/>
Edit content for others	<input checked="" type="checkbox"/>
Publish or unpublish own content	<input checked="" type="checkbox"/>
Publish or unpublish content for others	<input checked="" type="checkbox"/>
